

Tēgreen 97®

Cell Defence

ANTIOXIDANT DEFENCE SYSTEM SUPPORT

DIETARY SUPPLEMENT AUST L 69356

Positioning Statement

Tēgreen 97® is a proprietary, highly concentrated extract of the antioxidant catechins found naturally in green tea that promote long-term health and well being.

Concept

Green tea has been used traditionally in China for thousands of years for its health-preserving and revitalising power. Modern science has identified powerful antioxidants in green tea called polyphenols. One group of polyphenols called catechins is particularly potent and highly effective at neutralising free radicals at the cellular level. Catechins support healthy cell function while providing antioxidant protection to critical cell structures.

Tēgreen 97® from Pharmanex® is a proprietary, highly concentrated extract of the catechins found in green tea. As one of the most potent antioxidant supplements on the market, Tēgreen 97® has a 97% polyphenol content, 65% of which are catechins. Each Tēgreen 97® capsule contains the catechin equivalent of approximately seven cups of green tea and is 99.5% caffeine free. Recent clinical studies show consuming 400 to 600 mg of catechins at one time will more effectively increase the level of catechins in the blood and increase the amount of time they stay in the body.

Primary Benefits

- Contains 97% polyphenols - one of the most potent antioxidants known to science.
- Provides potent antioxidants to defend against free radicals at the cellular level
- Supports the antioxidant defence system in the presence of excess dietary fats, cigarette smoke, alcohol intake, pollution, stress and toxins
- Supports healthy cell function and helps protect cell structures
- Helps relieve sleeplessness *
- Helps relieve nervous tension, stress and mild anxiety *

What Makes This Product Unique?

- A proprietary green tea extract containing 97% polyphenols of which 65% are catechins
- Has the antioxidant power of seven cups of tea per capsule and is 99.5% caffeine free
- The 6S Quality Process ensures the quality and potency of each Tēgreen 97® capsule
- Standardised for consistent and powerful benefits
- In a comparative study, Tēgreen 97® was shown to have better bioavailability and antioxidant capacity than drinking green or black tea

Who Should Use This Product?

Any adult concerned about long-term cell health and their antioxidant status should take Tēgreen 97®. Individuals with a hectic, busy, or stressful lifestyle, or those frequently exposed to pollution might also find benefits from Tēgreen 97® supplementation.

Did You Know?

- After water, tea is the most widely consumed beverage in the world (3 billion kg per year)
- Tēgreen 97® comes from green tea grown in Zhejiang, the number one tea-producing region in the world
- Proprietary extraction of Tēgreen 97® ensures a higher level of actives than most green tea products
- The processing of black tea destroys all of the active components
- A recent study by UCLA compared the effects of plasma antioxidant activity after consuming Tēgreen 97®, green tea, or black tea. Tēgreen 97® was shown to be more bioavailable than drinking green or black tea, and increased plasma antioxidant capacity more effectively

Frequently Asked Questions

How does Tēgreen 97® work?

Increasing evidence suggests that the therapeutic effects of green tea are mediated by tea polyphenols. Tēgreen 97® provides

Tēgreen 97®

triple-action cell protection by supporting the body in neutralising three cell-jeopardising substances: free radicals, nitrosamines, and potentially harmful toxins.

Why is Tēgreen 97® unique?

Tēgreen 97® provides the most concentrated levels of green tea polyphenols available in most food supplements. Green tea characteristics vary widely according to region of growth, altitude, climate, and processing techniques. Pharmanex adheres to the time-honoured tradition of using only the finest leaf buds and young leaves of tea plants cultivated in Zhejiang Province. This province is the number one tea-producing region in China, producing some of the highest quality tea in the world. Our proprietary process maximises the concentration of the naturally occurring polyphenols, while virtually eliminating caffeine.

Are there scientific studies validating this product?

Epidemiological, animal, and in vitro studies document the health maintenance and antioxidant benefits of green tea. Numerous studies using the proprietary extract found in Tēgreen 97® (known as Xin Nao Jian in Asia), suggest that the polyphenols in Tēgreen 97® provide a broad spectrum of antioxidant benefits.

Is Tēgreen 97® standardised?

Each 250 mg capsule of Tēgreen 97® is a 20:1 extract of green tea leaves, standardised to contain a minimum of 97% pure polyphenols, 65% of which are the catechins (> 95 mg EGCG per capsule).

Is Tēgreen 97® decaffeinated?

Tēgreen 97® is considered decaffeinated for labeling purposes. Tēgreen 97® contains approximately 1.25 mg of caffeine per capsule, which is well below the stimulatory level. For comparison, a cup of coffee contains 100 to 150 mg of caffeine.

Is this product safe?

Tēgreen 97® is safe at recommended dosages. Pharmanex has been involved in multiple clinical studies in Asia evaluating the impact of Tēgreen 97® on health parameters. The majority of these studies used a dosage of 600 mg of Tēgreen 97® per day (200 mg green tea extract, taken three times daily). These studies showed benefits at this higher dosage without side effects. In addition, evidence derived from epidemiological data indicate that long-term consumption of 10 or more cups of green tea per day does not result in adverse effects and may be associated with significant health benefits.

Is there anyone who should not use this product?

Keep out of reach of children. If you are pregnant or lactating, or taking a prescription medication, consult a doctor before using this product.

Supplement Facts

	Amount Per Capsule
Camellia sinensis (green tea) leaf extract conc (20:1) equiv to 5 g dry leaf	250 mg

Other Ingredients: Millet powder, Gelatin, Magnesium Stearate, Magnesium Trisilicate, Silicon Dioxide, Water, Glycerol.

Directions for Use

As a dietary supplement, take one (1) to four (4) capsules daily; preferably one (1) to two (2) each morning and evening with food. Store in a cool, dry place.

Packaging

30 capsules (7-day supply) 120 capsules (30-day supply)

Warnings

Keep out of reach of children. If you are pregnant or lactating, or taking a prescription medication, consult a doctor prior to use.

* If symptoms persist consult your healthcare practitioner. Each capsule contains caffeine 1.25 mg.
