

The Difference begins with ME!

## 180°® Anti-Aging Skin Therapy System – Turn Back the Hands of Time!

A healthy cell turnover normally occurs every 28 days. This helps slough off dead skin cells, allowing treatment products to penetrate better. It also helps to make skin appear smoother and less blotchy. As you age, your skin renewal rate naturally decreases.

A recent Nu Skin 180°® Anti-Aging Skin Therapy System clinical study conducted at a third-party testing lab has proven that it helps to refine texture, promote elasticity, even skin tone, and diminish the appearance of fine lines and wrinkles for an overall more youthful appearance.

Turn back the hands of time with Nu Skin 180°® Anti-Aging Skin Therapy System featuring Polyhydroxy acids (PHAs) which are necessary in maintaining healthy skin.

My skin used to be dry, sagging and was developing signs of aging such as wrinkles and fine lines. I've tried many products but none of them could improve my skin condition.

After using 180°® Anti-Aging Skin Therapy System for 1 week, my dark spots have reduced; my skin became firmer, smoother and more radiant. It has also diminished my wrinkles and fine lines. After 2 weeks, my face looked different; I looked more youthful than before. I'm going to tell everyone that 180°® Anti-Aging Skin Therapy System is the best anti-aging treatment that can help me regain my youthful skin!
