

The Difference begins with ME!

Anti-Aging Skin Care

Aging problems caused by the DNA genes we inherit is a natural aging process that begins usually in our 20's. External factors often act together with the normal aging process to prematurely age our body tissues, destroying collagen protein - the main protein of connective tissue that is vital in wrinkle free skin care keeping skin plump, helping to diminish fine lines under eyes and keeping face wrinkles from forming.

Sun damage, repetitive facial expressions, gravity, smoking and stress are some contributing factors.

While you cannot stop the natural aging process, you can help your skin fight the battle with an anti-aging skin care treatments or maintain your present all natural youthfulness.

Defy gravity and fight the signs of aging with a targeted anti-aging product: Tru Face™ Essence Ultra. Leave undefined skin in the past and enjoy firmer, more youthful looking skin today - and tomorrow.

I always take good care of my skin. I have tried many recommended products. When I reached the age of forty, wrinkles began to appear. I was looking for a good anti-aging product and I came across the testimonials of consumers who have used Nu Skin products. Therefore, I decided to use Tru Face® Essence Ultra and 180°® Anti-Aging Skin Therapy System which help diminish fine lines and firm the skin. After using them for the first time, I experienced the difference almost immediately! My skin was more moisturized, smoother and more radiant. and pores were tightened. After 2 weeks my sagging skin became firmer and my face obviously had less laugh lines. I was very impressed!
