

The Difference begins with ME!

Make The Choice to Look Young

Past generations used skin creams that reduced the appearance of fine lines and wrinkles by temporarily plumping up the skin. Today's most advanced multi-tasking moisturizers and facial serums contain multiple compounds that work synergistically to turn back the clock, changing the skin at the cellular level.

What makes today's over-the-counter skin care products better? Scientists have been applying their knowledge of genes to better understand how skin ages. Along with that understanding comes a new and innovative technology that can help keep you looking young, smooth, and healthy.

Introducing ageLOC™ Transformation, a powerful line up of four products which is our most advanced anti-aging system ever, delivering unsurpassed anti-aging benefits. This complete and comprehensive skin care system cleanses, purifies, renews, moisturizes, and reveals younger looking skin in eight ways—for a more youthful, healthier looking you now and in the future.

BEFORE

AFTER

The first time I bought ageLOC™ Transformation was during its launch in Singapore. I started to use ageLOC™ in April. After using the product for a few weeks, I could already see the results.

The longer I used ageLOC™, I saw a more dramatic and amazing result. My skin became brighter, and firmer, not only on my face but also on my neck. To top it all, my pigmentation were less visible and wrinkles were less noticeable than ever!

I was very happy when I finally met with friends because when they were trying to guess my age, they always tell me that I look younger than my actual age. ageLOC™ is the best!
