The Beauty From Within

膠原蛋白

是構成我們身體的重要元素，包括真皮層肌膚、肌肉纖維、關節、骨骼等，但由 20 歲起，體內的膠原蛋白便每年流失 1.5%，即到 30 歲便已流失 15%！

Collagen is one of the key elements of our body components, including dermis, muscle fibre, joints, bones etc. But we loss 1.5% collagen per year after age of 20, that means, we loss 15% collagen at age 30!

紫外線中的 UVA

速食、不均衡飲食習慣
Instant, imbalance eating habits

熬夜、喝酒、吸煙等
不良生活習慣

Unhealthy lifestyle like stay up
late, drinking and smoking

以上種種都會加速膠原蛋白流失，導致肌膚彈性變差，出現細紋及皺紋，

補充膠原蛋白刻不容緩！

All of the above accelerated loss of collagen which leads to loss of elasticity and appearance of fine lines and wrinkles, it's a MUST to replenish collagen now!
