

Media Fact Sheet

ageLOC® LumiSpa

One Step. Two Minutes. Seven Skin Benefits.

ageLOC LumiSpa is a dual-action skin care device that simultaneously provides a superior skin-perfecting treatment and deep cleansing benefits. It leaves skin smoother and softer after just one use and delivers seven skin benefits that increase over time. A first-of-its-kind system, the ageLOC LumiSpa device uses its soft silicone treatment head along with a choice of five ageLOC LumiSpa treatment cleansers to gently—yet deeply—cleanse away dirt, oil, makeup, pollutants and toxins.

Dual-Action Skin Renewal and Deep Cleansing System

The ageLOC LumiSpa device stands apart from other cleansing devices with its patent-pending oscillating and pore-purifying motion, which optimizes the benefits of both the skin-perfecting treatment and deep cleansing. The ageLOC LumiSpa head moves at a precise frequency, validated through clinical studies, to promote skin renewal by removing dead skin cells and improving skin brightness and smoothness. The treatment heads are embedded with antimicrobial silver and have a nonabrasive silicone surface that is more gentle and hygienic than brushes commonly used with other devices.

Users can choose from five treatment cleansers, each formulated for specific skin types—dry, normal/combo, oily, sensitive, and acne-prone—to help reveal pure, radiant and refreshed skin. The various formulas feature Nu Skin's proprietary blend of ageLOC ingredients as well as natural ingredients such as Japanese knotweed, pomegranate extract, milk thistle, rhododendron extract, oat kernel extract and Chinese red pine bark extract.

Usage

ageLOC LumiSpa is ideal for women and men seeking to maintain radiant, youthful looking skin and minimize the visible signs of aging. To use, moisten face with warm water and apply ageLOC LumiSpa treatment cleanser evenly onto the face. Simply press the power button and slowly glide the treatment head back and forth using broad strokes. The device will pause every 30 seconds to prompt you to move to the next quadrant on your face. For best results, use ageLOC LumiSpa every morning and night.

Availability

The ageLOC LumiSpa system, which includes the LumiSpa device, silicone treatment head, treatment cleanser and charging base, will be available in 2018 in the U.S. for \$198.75.

Features & Benefits

- Skin feels softer and smoother after just one use
- Delivers seven skin benefits that intensify over time:
