

Clinical results that prove it

Subjects were instructed to apply the ageLOC Nutriol Intensive Scalp & Hair Serum to their scalp twice daily and follow each application with a two-minute ageLOC Galvanic Spa application. Subjects used the ageLOC Nutriol Scalp & Hair Shampoo and ageLOC Nutriol Hair & Scalp Conditioner in place of their regular shampoo and conditioner according to their regular hair wash routine.

Clinical Evaluation

A clinical grader reported the following improvements in subjects' hair after 6 months:

Self-Perception

More than 90% of subjects felt their hair improved in volume, thickness, softness, shine, and healthy appearance at the end of the study.

Brush-Friction Hair Count

After six months, there was a 72% reduction in the number of broken hairs. This illustrates the strengthening of hair throughout the study.
