

THERE'S NO PLACE LIKE HOME

Why visit a clinic for your anti-ageing treatments when you can luxuriate at home (and spend a fraction of the cost!) We look at the very latest spa system from Nu Skin and learn how to transform a house into a home spa...

We all love a pampering at a luxurious spa. A weekend away with friends lounging around by the pool, consuming health shakes and being covered in seaweed wraps and mineral mud - of course, the downside is the hammering your credit card takes.

That's why many people are turning to home spa treatments. These are a range of devices and products which offer luxury and convenience in the comfort of your own living room.

One such system is the Nu Skin ageLOC® Edition Nu Skin Galvanic Spa System® II. It's an instrument with patented self-adjusting galvanic currents and interchangeable conductors that delivers a blend of ingredients to target the sources of ageing in skin.

While the current stimulates cell rejuvenation in your face, body and scalp, the gels help eliminate toxins and impurities from your skin while minimising your pores and allowing them to breathe.

Small, smart and powerful, the Nu Skin Spa System delivers up to five times more key anti-ageing ageLOC® ingredients to your skin than any other previous device. Research shows that the ageLOC® Edition Nu Skin Galvanic Spa System® II boosts the visible benefits of ageLOC® Future Serum by an average of 80%.*

How Does It Work?

Clear your diary, turn off your phone, set the mood with your favourite music and prepare to turn back time under your own terms and conditions. The surface of the proprietary ageLOC® Face Conductor is designed to push the anti-ageing properties of the ageLOC® product into the skin.

Step 1 – Detox the skin.

During this pre-treatment, negative charges are generated to pull out toxins and impurities in the skin and bind them to the cleansing gel.

Step 2 – Treatment.

During the treatment cycle, the ageLOC® Edition Nu Skin Galvanic Spa System® II instrument and the treatment gel are positively charged. These positive charges repel each other, helping to deliver the beneficial ingredients to the skin, including the exclusive ageLOC® ingredient blend. The

positively charged instrument attracts the remaining negatively charged impurities from the pre-treatment cycle, drawing them out of the skin.

Step 3 – Enhance results

Maximise your skin's potential by applying the anti-ageing products from ageLOC® Transformation after each treatment.

Step 4 – Lie back and relax

Four Products with Eight Outcomes

The key to a successful home spa experience is to use professional products which can produce spa-quality results. For example, the ageLOC® Transformation set is an advanced anti-ageing system which cleanses, purifies, renews and moisturises.

There are eight benefits to the products which will complete your home spa experience:

1. **Promote youthful skin structure. The patent-pending ingredient technology stimulates collagen production.**
2. **Smooth texture. Ingredients are proven to stimulate youthful cell renewal for smoother, softer skin you can feel.**
3. **Even skin tone. Reducing the appearance of blotchy, dull and uneven skin for a smooth, youthful look.**
4. **Reduce the appearance of fine lines and wrinkles.**
5. **Increase skin radiance with skin brightening technology.**
6. **Reduce the appearance of pores through youthful cell turnover.**

7. **Reduce discolouration. The production of unwanted melanin in the skin creates a reduction in spots of discolouration.**

8. **Increase hydration. Hyaluronic acid, a moisturising compound found naturally in the skin, is encouraged.**

All that's left for your home spa experience is a relaxing sleep in crisp, clean bedding – you'll wonder why you ever paid hundreds of pounds for a weekend away.
