

# Live life to the fullest

It is now, when I look in the mirror that I see the woman I really am. It is now I feel my inner beauty, my radiance and my confidence. It is now I know how to take care of myself; to act on those small things that make me feel beautiful and secure. It is now I trust my choices to be the ones to keep me feeling and looking radiant.

Discovering Nu Skin was incredible, as they shared all my thoughts on beauty and confidence. Age is not a number; it is a feeling and a sense of belonging. For me, the scientific impact of the ageLOC® range has been a revelation.

Just recently, I found the new ageLOC® Tru Face Essence Ultra that helps contour and firm my skin and it gives more definition to my skin and I use it around my eyes, neck, chin, mouth and jawline as part of my daily skin care regime.

With this product, Nu Skin has developed a revolutionary anti-ageing science with the purpose to target the sources of visible signs of ageing and loss of

firmness. I choose ageLOC® Tru Face Essence Ultra, as I want my skin looking radiant and firm longer. The product features Ethocyn®, a clinically proven ingredient created to promote the key components of a firm skin.

When I was researching the product, I came across some revealing facts. In a clinical study for ageLOC® Tru Face Essence Ultra, **55% of people saw an improvement in as little as a week**, while an impressive 80% showed improvements in 12 weeks.

It is my belief that it is never too early to start taking care of your skin, as your skin will walk with you for your entire life; like a secret passed from generation to generation. Investing in your skin at an early age will let you reap the results.

In this point of my life, I don't need to compromise on my beauty; I can truly have it all. I can show the world how I really feel inside - confident, mature, and above all; youthful.
