

FAQs

HOW IS AGELOC® TRU FACE® ESSENCE DUET DIFFERENT FROM AGELOC® TRU FACE® ESSENCE ULTRA?

ageLOC Tru Face Essence Duet extends the benefits of ageLOC Tru Face Essence Ultra beyond the face. It provides targeted anti-aging and intense moisturization for the neck and décolleté. To adequately address the needs of your skin, we formulated ageLOC Tru Face Essence Duet specifically for these vulnerable areas.

WHY DOES AGELOC® TRU FACE® ESSENCE DUET HAVE DUAL CHAMBERS?

ageLOC Tru Face Essence Duet was designed with a unique format and aesthetic. This product combines a gel and lotion to provide an unprecedented cushiony feel users will love. The airless pump helps provide this exclusive product in even doses.

WHAT ARE THE DIFFERENCES BETWEEN THE TWO PRODUCTS IN THE DUAL CHAMBERS IN AGELOC® TRU FACE® ESSENCE DUET?

The opaque white cream in one chamber includes a proprietary ageLOC blend and other anti-aging actives. It helps provide extra moisturization and instant radiance while helping to improve skin texture through enhanced cell turnover. The clear formula in the second chamber contains a blend of ingredients similar to ageLOC Tru Face Essence Ultra formulated specifically to provide contouring benefits to the neck and décolleté.

HOW DOES AGELOC® TRU FACE® ESSENCE DUET FIT INTO MY SKIN CARE REGIMEN?

After cleansing in the morning, apply ageLOC Tru Face Essence Duet to your neck and décolleté. Follow up with sunscreen or another product with SPF. At night, apply ageLOC Tru Face Essence Duet after cleansing, before going to bed.

IS AGELOC® TRU FACE® ESSENCE DUET SAFE TO USE ON MY FACE?

We formulated ageLOC Tru Face Essence Duet specifically for application on the neck and décolleté. We have not tested it for facial application and so we would advise against using it on the face.

HOW IS SKIN ON THE NECK AND DÉCOLLETÉ DIFFERENT THAN FACIAL SKIN?

The skin on the neck and décolleté is often neglected in a daily skin care regimen, even though it is exposed to environmental damage (e.g. from UV rays) and constantly endures chaffing from clothing. This neglect can result in visible damage like poor texture, wrinkled appearance, and loss of contour. In addition, the neck can be more sensitive and delicate because it is in constant motion.
