

Venix®

Sexual Health

PROMOTES HEALTHY SEXUAL WELL-BEING*

Positioning Statement

Venix® contains a unique blend of proprietary ingredients to help promote normal sexual function and enhance your intimate moments.*

Concept

Sexual well-being is an important part of overall good health and during recent years, the concern over sexual inadequacy has received increased interest. Millions of people are likely dissatisfied with their current level of sexual function in their personal intimate relationships. An estimated 30 million men in the United States have some degree of diminished sexual function. Men over 65 years of age account for the majority, but the problem has also been found in approximately 5% of men in their 40s. While mostly affecting men, women can also experience disappointment with their current level of sexual function. A lack of satisfying sexual function can create occasional mental stress that affects a person's interaction with others. Diminished sexual function increases with age, but is not an inevitable consequence of aging.

Venix® is an all-natural dietary supplement uniquely formulated to provide the right combination of complementary ingredients that help to improve your intimate moments. Venix® consists of Triacin™, a proprietary blend of Cordyceps sinensis in Cs-4®, ginkgo biloba extract, and L-arginine. This potent blend helps to promote sexual well-being. Moreover, as each ingredient works via different mechanisms, Venix® provides a multi-faceted answer to sexual concerns.*

Primary Benefits

- Promotes sexual well-being*
- Promotes vitality and stamina*
- Assists the body in maintaining healthy hormonal balance*
- Helps support circulation, essential to normal sexual function*

What Makes This Product Unique?

- 100% natural formula
- Clinically-supported
- Scientifically proven to be safe and effective

As a dietary supplement, Venix® is intended for adults who want to maintain sexual well-being.*

Did You Know?

- Approximately 30 million men in the U.S. have diminished sexual function
- Sexual concerns can be related to numerous factors such as anxiousness, diet, and diminished health
- Approximately 43% of women experience some form of sexual dissatisfaction

Frequently Asked Questions

What ingredients does this product have?

Venix® consists of a proprietary blend of Cordyceps sinensis, ginkgo biloba extract, L-arginine, and provides 1.325 grams of Triacin™ per serving.

How does this product work?

Venix helps promote sexual well-being in the following three important ways: by supporting healthy blood circulation, promoting vitality and stamina, and assisting the body in maintaining healthy hormonal balance.*

Healthy circulation is an important element in normal sexual function. Hormone levels, mood, and emotional well-being also affect sexual well-being. The constituents found in Triacin™ have been shown to influence circulation, assist normal hormonal balance, and promote vitality and stamina. Allow four to six weeks for Venix® to produce desirable results.*

Venix®

Are there scientific studies validating this product?

In a clinical study, Venix® significantly improved sexual well-being in men experiencing diminished sexual function. Participants who took Venix® saw a 34% improvement, while the placebo group experienced an 8% decrease. Overall, 72% of participants supplementing with Venix® experienced marked improvement in sexual well-being versus only 12% of participants taking a placebo. Numerous third-party clinical studies independently validate the use of ginkgo biloba extract, Cordyceps sinensis Cs-4®, and L-arginine for the promotion of sexual well-being.*

How are the ingredients in this product standardized?

The ginkgo biloba extract in Venix® is standardized to 27% ginkgo flavone glycosides and 7% terpene lactones. Each batch of Cordyceps sinensis Cs-4® is standardized by HPLC to guarantee potency and consistent results by supplying minimum levels of 0.14% adenosine. An additional test method is used to standardize to 5% mannitol, an indicator of polysaccharide content.

Is there anyone who should not use this product?

Anyone taking anticoagulants or anti-thrombotics should not use this product. Do not use if you are taking monoamine oxidase (MAO) inhibitors or if you are allergic to the ginkgo biloba plant or its products. Keep out of reach of children. If you are pregnant or nursing, or taking a prescription medication, consult a physician before using this product.

Due to ginkgo biloba's mechanisms of action, persons taking anticoagulants that affect platelet aggregation should consult with a physician. Also, as a result of the content of adenosine in the Cordyceps sinensis fungus, the inhibition of platelet aggregation may affect patients on blood-thinning and anti-thrombotic medications. Consult with your physician if you are taking any medications.

Is this product safe?

The ingredients in Venix® are safe when used according to directions. No side effects have been reported when used according to directions. Very large doses of ginkgo biloba in humans may cause restlessness, diarrhea, nausea, vomiting, and other unpleasant effects usually of a relatively mild nature.
