FREQUENTLY ASKED QUESTIONS
What are aging defense mechanisms?
Aging defense mechanisms are the body’s way of fighting off and maintaining resistance to aging aggressors. As we age, changes in gene expression cause the body’s aging defense mechanisms to decline in function, performance, and ability. ageLOC Y-Span maintains and supports the activity of aging defense mechanisms by positively modulating gene expression, helping us to live youthfully.*

Can I take LifePak with ageLOC Y-Span?
It is recommended to take one of the LifePak Nutritional products with ageLOC Y-Span in order to provide your body with the nutritional building blocks required for optimal health.

Why is the ageLOC Y-Span ingredient blend difficult to obtain?
ageLOC Y-Span contains a unique ingredient blend that provides broad-spectrum benefits for everyone regardless of dietary intake or supplement regimen. ageLOC Y-Span provides a potent blend of anti-aging ingredients—concentrated extracts standardized for active ingredients—that would be difficult to obtain on a regular basis from even a healthy, well-balanced diet. Furthermore, ageLOC Y-Span delivers efficacious levels of these powerful nutrients and phytochemicals at consistent levels twice per day.

What is different about the ageLOC Y-Span capsules?
ageLOC Y-Span takes advantage of a unique technology, called Licap®, that allows delivery of both liquids and solids together in a hard shell capsule.
