

INNER FOCUS™ BOTANICAL BEVERAGE MIX ORANGE WITH COLLAGEN PEPTIDE

THE PROOF IS IN THE PLUS

Beauty has no gender. Beauty is everywhere and within everyone. And Inner Focus is all about how you look and feel. It's a physical reflection of your inner health. It's about the visible results you can achieve with the help of the right nutritional supplements. The secret to a beautiful outside begins on the inside.

MEET INNER FOCUS COLLAGEN PEPTIDE

Are you ready to drink your way to show-stopping results? Kickstart your journey to a better skin with Inner Focus Collagen Peptide. How? It's all about our proprietary blend that enhances your beauty with a combination of unique benefits.

Let's start with our Inner Focus Collagen Peptide. While many common collagens provide the building blocks your skin needs, collagen peptides go a step further—boosting collagen and elastin production.

But our fantastic formula doesn't stop there. We've also handpicked a carotenoid called Lutein, from marigold flowers, that helps improve skin radiance and helps protect against oxidative stressors.

With all this, Inner Focus Collagen Peptide helps improve skin texture, radiance, and overall appearance on its own. But, when combined with other topical skin care regimens, the visible results are even more all-out amazing! Sip your way to skin that's inside-out gorgeous with this win-win from within.

WHY YOU'LL LOVE IT

- Helps boost collagen and elastin production in your skin*.
- Helps support skin hydration and healthy moisturization*.
- Helps protect against the damaging effects of oxidative stressors.
- Helps you look more youthful.
- Helps visibly reduce fine lines and wrinkles.
- Helps improve skin health and prepare skin for better complementary benefits with Nu Skin® topical skin care regimens.
- Helps increase SCS, so you know carotenoids are being absorbed and increasing your scanner score.
- Formulated without artificial colors, flavors, or sweeteners.
- Features a naturally delicious, orange flavor.

WHAT POWERS IT

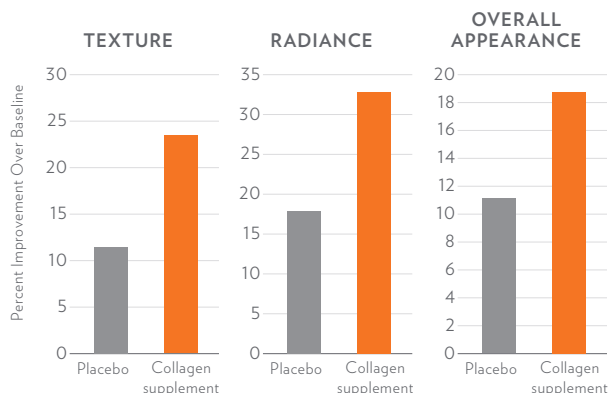

- **Collagen Peptides**—elite collagen peptides that helps increase collagen and elastin production.
- **Lutein**—this important carotenoid helps protect skin against oxidative stressors.

INNER FOCUS™ BOTANICAL BEVERAGE MIX ORANGE WITH COLLAGEN PEPTIDE

CLINICALS THAT PROVE IT

Nu Skin commissioned a third-party clinical study to evaluate the efficacy of taking similar collagen supplement once a day for four months. This study used a double-blind methodology with part of the group receiving a placebo.

CLINICAL GRADING AT 4 MONTHS

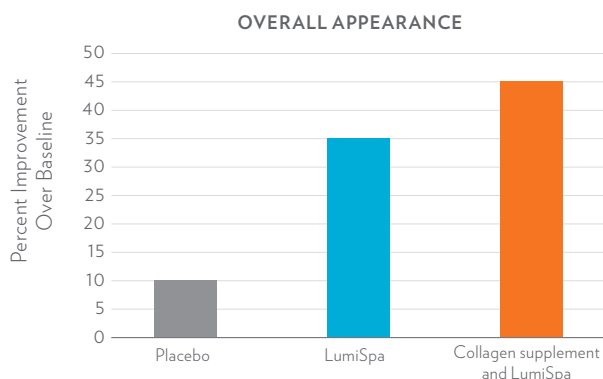

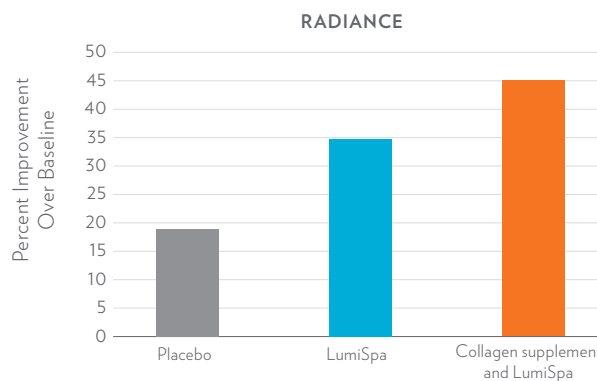

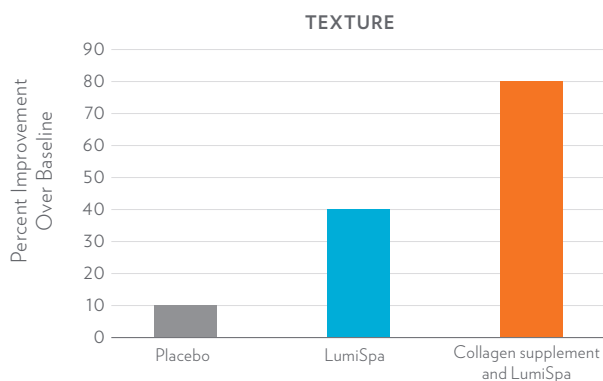

- Significantly helps improve skin texture, radiance, and overall appearance.

2

RESULTS THAT ARE BETTER TOGETHER

With its inside-out approach to beautiful and healthy skin, using similar collagen supplement helps prepare skin for better visible results from many topical Nu Skin products. In a clinical study, participants took the collagen supplement once a day and used an ageLOC® LumiSpa® regimen daily for four months. The results were even more all-out amazing!

- Taking Collagen supplement prepares skin for better complementary benefits and skin health, nearly doubling the visible texture benefits of an ageLOC LumiSpa regimen, compared to an ageLOC LumiSpa regimen alone*.

*over baseline after four months, according to expert visual grading.

INNER FOCUS™ BOTANICAL BEVERAGE MIX

ORANGE WITH COLLAGEN PEPTIDE

HOW TO USE IT

Mix into 8 oz. of water and enjoy one to two times daily. Store in a cool, dry place.

TRY THESE WITH IT

- ageLOC® LumiSpa® System
- Nu Skin® Galvanic Spa System
- Tru Face® Line Corrector
- ageLOC® Transformation System
- Nu Skin 180°® Skin Therapy System
- Nutricentials® Bioadaptive Skin Care™
- ageLOC® You-Span Pack

LEARN MORE ABOUT IT

What makes Inner Focus Collagen Peptide unique?

Inner Focus Collagen Peptide is a skin care supplement that helps support multiple important areas of skin health. It helps reduce fine lines and wrinkles, supports hydration and moisture levels, and boosts collagen and elastin production in the skin. Lutein adds important radiance benefits and antioxidant protection, including protection against oxidative stressors.

What is collagen?

Collagen is an important structural protein found throughout your skin, bones, muscles, tendons, ligaments, and cartilage. As an adult ages, your body produces about 1.5% less collagen every year, and its production can also be inhibited by oxidative stressors such as sunlight. Collagen peptides are a better form to supplement this important collagen, because they are more digestible, better absorbed, and better distributed throughout your body. This dual action is vital to supporting healthy skin.

Why is Lutein included in Inner Focus Collagen Peptide?

Lutein is a carotenoid derived from marigold flowers and has been shown to help improve skin radiance. It does this through its antioxidant properties that protect against the damaging effects of oxidative stress. Another benefit is that carotenoids like Lutein can be measured in the skin using a Pharmanex® BioPhotonic Scanner.

Do I need to use Inner Focus Collagen Peptide with Nu Skin® topical skin care products to see results?

No. Inner Focus Collagen Peptide is effective by itself. However, Inner Focus Collagen Peptide also helps

improve your skin health and prepare skin for better complementary benefits with Nu Skin topical skin care regimens. For example, when taken in conjunction with an ageLOC® LumiSpa® regimen, Inner Focus Collagen Peptides helps enhance the visible skin radiance, texture, and overall appearance benefits of the LumiSpa system. You can certainly use Inner Focus Collagen Peptides alone, but for the best results possible, we recommend you use it in conjunction with a Nu Skin topical skin care regimen to better support your health and beauty inside and out.

Can I mix Inner Focus Collagen Peptide in a warm drink?

Yes! You can mix Inner Focus Collagen Peptide with both cold and warm drinks without hurting its efficacy.

What is SCS?

SCS means skin carotenoid score, as measured by our Pharmanex® BioPhotonic Scanner. Carotenoids are a class of important antioxidants that can come from a variety of sources, including fruits, vegetables, and your supplements. If a product will raise SCS, then you can expect that using it will increase your scanner score over time.
