# BE PART OF SOMETHING EXTRAORDINARY!

Create a lasting change for children in need around the world

## THE NEED

EVERYDAY, OVER 137 CHILDREN ARE BORN WITH HEART DEFECTS

Congenital heart disease is the most common birth defect globally, affecting 1 in every 100 children.

Without treatment, one third of these children die before their first birthday. In Southeast Asia alone, more than 50,000 children are born with congenital heart disease (CHD) every year, but many are unfortunate compelled to postpone life-saving surgery due to lack of resources.

## GIVING HOPE, HEALING HEARTS

Give hope to a child. A help that will last a lifetime! There's no greater reward than to know you have changed a child's life forever.

## DISCOVER THE JOY OF SPONSORING A CHILD!

### Tanyathorn Kerdpol, 6 months old, Thailand

Tanyathorn Kerdpol (or Nam Jai) is the second child in the family. While Nam Jai's mother was pregnant, she had to temporarily move from Nontaburi to Nakornpathom due to Thailand flood disaster last year. Nam Jai was born at Nakornpathom hospital with green face and body. The doctor diagnosed Nam Jai with Transposition of the Great Arteries. When Nam Jai was 4 days old, she was transferred to Kasemrad hospital Prachachuen for immediate operation to save her life. After the operation, she is healthy like normal kids and her mother is very appreciative of all the help rendered.

After surgery

### Precious Anne Pasion, 7 years old, Philippines

Precious Anne was diagnosed with the congenital heart disease called Ventricular Septal Defect, but with her father working as a tricycle driver and her mother a plain housewife, the family was struggling to make ends and could not afford to pay for their child's costly operation on their own. Through CHILD Foundation's partnership with Nu Skin, the cost of Precious' operation was covered and she successfully underwent corrective heart surgery. Precious now looks forward to a brighter future, free from such a life-threatening disease.

After surgery

### Roy Endie Ramlan, 9 years old, Malaysia

Roy was only 7 years old when he was diagnosed with a hole in his heart. Fortunately, he was given the needed operation in June 2008 through the help of SEA-CHF. Roy and his family are so happy and very grateful to SEA-CHF for giving their son a normal life. Now, he does not need to take medication and looks forward to going to school everyday. His ambition is to be a policeman when he grows up.
