KEY INGREDIENTS

- **Job's tears**—this plant grows as a tall wild grass along trails and roadsides. Rich with amino acids, the root was used historically in tropical Asia for calming troubled skin conditions. It was well known for its ability to target and help relieve the pressure associated with blemishes. Job's tears

extract is a key ingredient in Epoch® Blemish Treatment to help soothe the skin affected with blemishes.

- **Yarrow and burdock**—these botanicals have been widely used for centuries by Native Americans to calm a variety of irritating skin conditions. The plants were made into a poultice and applied directly to afflicted areas as a calming remedy. These herbal extracts work together in Epoch® Blemish Treatment to help calm troubled skin.
- **Salicylic acid**—cleanse and exfoliate the skin to help reduce blemishes and breakouts.

USAGE/APPLICATION

Cleanse the skin thoroughly before applying Epoch Blemish Gel. Cover the entire affected area with a thick layer up to three times daily. Because drying of the skin may occur, begin with one application daily, gradually increasing applications as needed. If dryness or peeling occurs, reduce application to once a day or every other day.
