Nu Skin Discovers an Ultimate Source of Aging

Through ageLOC science, Nu Skin is able to identify certain genes that can regulate how we look as we age. These functional groups of genes—Youth Gene Clusters—are key arSuperMarkers. ageLOC science supports resetting these Youth Gene Clusters to their youthful patterns of activity and incorporates this science into the development of Nu Skin® products.

A REVOLUTIONARY DISCOVERY

Developed by Nu Skin in collaboration with leading scientists, ageLOC™ science is a revolutionary approach to developing anti-aging products that is changing the way we appear to age. This unique and proprietary science is based on the discovery of age-related super markers, what Nu Skin calls arSuperMarkers. Nu Skin's exclusive ageLOC science targets these arSuperMarkers—the ultimate sources of aging that can influence how we age.
