A third-party clinical research organization was commissioned to conduct an investigative research study to understand the impact of the ageLOC LumiSpa iO system on the facial skin's microbiome.

	NORMAL TO COMBINATION		DRY		ACNE/OILY	
	Pre	Post	Pre	Post	Pre	Post
Cutibacterium acnes	36.92%	47.26%	44.29%	45.90%	51.94%	60.30%
Staphylococcus epidermis	1.44%	0.98%	4.58%	6.37%	7.91%	5.75%
Streptococcus_u_s	10.34%	3.34%	0.74%	0.56%	0.72%	0.54%
Micrococcaceae	1.67%	2.53%	1.75%	2.10%	1.54%	1.54%

From the study, it shows that there was little variation between individual's microorganism populations at before use versus post-use, illustrating that the ageLOC LumiSpa iO system did not negatively alter the skin's microbiome for these subjects.
