

NU SKIN.
THE DIFFERENCE. DEMONSTRATED.®

HOW DO YOU LIVE YOUNG?

Youthful Aging

The human body is a miracle. It naturally learns, evolves, and repairs itself. In fact, it is designed to live young.

We are all born with internal aging defense mechanisms designed to resist the effects of aging. But over time, external and internal influences can disrupt natural youthful activity of these mechanisms and accelerate aging effects in the body.

No one wants to look or feel old. Even as we age, we all want our bodies and minds to continue feeling youthful and healthy. The key is to give the body what it needs so that it can continue to do what it is designed to do – Live Young.

Introducing Nu Skin's most advanced anti-aging supplement – ageLOC Y-Span. This revolutionary supplement is designed to promote your youth span – the years you can enjoy life being more active, energetic and healthy.

The power to defy your age.

What are Aging Defense Mechanisms?

Aging defense mechanism are the body's way of promoting the healthy regulation of damage and repair processes. However, as we age, changes in gene expression cause the body's aging defense mechanisms to decline in function, performance and ability.

ageLOC Y-Span maintains and supports the activity and function of the body's aging defense mechanisms by positively modulating gene expression, helping us to live youthfully.

The power to defy your age.

A revolutionary anti-aging supplement that helps revitalize our aging defense mechanisms.

Staying at the forefront of science and innovation, Nu Skin has built upon our nutritional and antioxidant anti-aging knowledge with the addition of our anti-aging gene expression research.

Understanding the way genes react to specific ingredients and applying that knowledge, we have created our most advanced anti-aging supplement ever.

Competitive Advantage

- Our most advanced Anti-aging Supplement
- 4 years scientific researches and clinical studies
- Proprietary ageLOC technology and exclusive access to gene expression science and one of the largest data established by LifeGen Technology
- ageLOC Youth provides an innovative blend of ingredients with unique health benefits including the ability to positively affect gene expression.
- Contains a unique blend of nutrients that is not readily available from even a healthy diet.*
- Positively modulates gene expression to support healthy aging defense mechanisms

* These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

ageLOC Youth takes advantage of a unique technology, called Licap®, that allows delivery of both liquids and solids together in a hard shell capsule. Delivering ageLOC Y-Span through this technology improves the bioavailability of fat-soluble ingredients, which helps ensure the delivery of anti-aging benefits.

It is designed to **live young.**
