1 STEP

+ 2 MINUTES

= 7 SKIN CARE BENEFITS

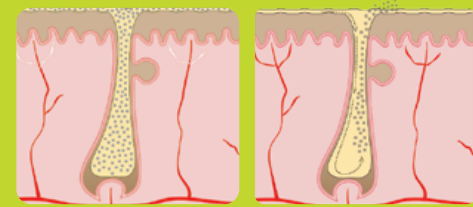

- Skin renewal
- Skin smoothness
- Increased radiance
- Refreshed skin
- Purified skin
- Minimized appearance of pores
- Increased appearance of volume and density

MICROPULSE OSCILLATING TECHNOLOGY

ageLOC LumiSpa is a truly innovative product that offers real results and saves you time by treating and cleansing your skin at the same time.

Featuring the proprietary Micropulse Oscillation Technology with its precise motion and frequency, it helps to stimulate the skin for more effectiveness in treatment and cleansing.

TREATMENT & CLEANSING

The wiping action opens the pores, allowing the cleanser to emulsify with oils within the pores.

The treatment head movement creates a massaging action that refreshes the cleanser within the pores, taking with it the debris and oils.

SILICONE TREATMENT HEADS THAT WON'T DAMAGE YOUR SKIN

ageLOC LumiSpa features two soft silicone heads (Firm & Normal) with antimicrobial silver that are more hygienic and easier to clean. Silicone has just the right firmness to benefit your skin, and the antimicrobial silver helps prevent bacteria from building up over time.

- 1 Two types: normal & firm
- 2 Gentle & Non-abrasive
- 3 Exfoliate evenly
- 4 Won't pull facial hair
- 5 Easier to clean
- 6 More hygienic with antimicrobial silver

ACTIVATING CLEANSERS BASED ON YOUR SKIN TYPE

- 1 Nu Skin's proprietary, all natural ageLOC ingredient blend that capture liberated pollutants, impurities and oils to be rinsed away
- 2 Formulated for different skin types
- 3 Carefully formulated cushioning layer ensures stimulating massage treatment experience
- 4 Low-foam formulas ensure a gentle connection between the treatment head and skin

* Only Normal/Combo Activating Cleansers are available during October 2017 Ruby Preview and November 2017 Executive Preview.
