INTRODUCING NU SKIN INNOVATION AND OUR 6S QUALITY PROCESS.

Scientific innovation has established Nu Skin® as a leader in the health and beauty industries. Our proprietary product formulations and technologies enable us to set new industry standards in the sources of ageing, with real solutions that exhibit demonstrable results. Our team of in-house scientists demonstrates our commitment to research and development by collaborating with leading research institutions. These collaborative relationships help us to develop next-generation skin care, beauty and nutritional products.
Nu Skin® is taking the science of the sources of ageing to a completely new level by studying the genetic origins of how and why we age.”

Dr. Joseph Chang, Chief Scientific Officer Executive Vice President Product Development

THE FUTURE OF LOOKING AND FEELING YOUNG.

Based on years of unparalleled research in skin and nutritional science, Nu Skin® has ushered in a new era with our exclusive ageLOC® science, so you can unlock your youthful potential. The ageLOC® brand is a comprehensive approach—targeting the ultimate sources of ageing to diminish the look and feel of ageing. Get ready to discover the products that will improve different aspects of your life. It’s time to unlock the new you.

7
AGELOC® SCIENCE.

Nu Skin® has taken the latest insights of how to impact the visible signs of ageing to a new level. In collaboration with some of the world’s leading anti-ageing researchers, Nu Skin® scientists have identified key groups of genes called age-related super markers or arSuperMarkers, that influence how we seem to age. Nu Skin®'s exclusive ageLOC® science targets these ultimate sources of ageing to develop products that help you look and feel younger.

IDENTIFYING THE SOURCE

The scientific community has open access to the Human Genome, but Nu Skin®'s breakthrough ageLOC® science gives us the ability to interpret it in a meaningful way. In a recent discovery, Nu Skin®, along with anti-ageing and genetics experts, identified key groups of genes called Youth Gene Clusters. Nu Skin® believes that finding and identifying these functional groups of genes is crucial to addressing the visible signs of ageing at the source.

Clinical study results, genomic analyses and substantiated research have led Nu Skin® scientists to identify genes of which the expression profile shares characteristics associated with youthfulness. The expression of these genes is responsible for the visible signs of ageing on our skin.

REBALANCING YOUTH

Once these key groups of genes have been identified, it is necessary to understand how their activity can reflect a more youthful skin profile. Rebalancing this profile is a subtle process, it is not as simple as turning them all on or off. Some skin markers may need to be turned down and others turned up. Nu Skin®'s proprietary ageLOC® science creates new opportunities to support a younger looking skin and body.

6S QUALITY PROCESS

1. SELECTION.
Nu Skin works with experts around the world to gather both historical and new scientific insights about ingredients.

2. SOURCING.
Once we select a material, our experts travel the globe to investigate potential commercial sources.

3. SPECIFICATION.
We set strict specifications to provide a basis for active compounds, ingredients, and criteria for finished products.
“Nu Skin® uses gene chip technology to identify functional groups of age-related super markers – what we call Youth Gene Clusters. Our research on Youth Gene Clusters helps us to better understand the mechanism of the visible signs of how we look as we are ageing.”
Helen Knaggs, Ph.D., Vice President Global Research & Development

4. STANDARDISATION.
Raw materials must meet our specifications to certify their readiness for product manufacturing. Once manufactured, our products are tested to meet their finished good specifications.

5. SAFETY.
We adhere to high product safety standards by reviewing scientific literature and conducting standard safety studies.

6. SUBSTANTIATION.
We take great care to ensure that our products and ingredients are not only safe, but effective.
FROM THE OUTSIDE IN.

Nu Skin is a leader in the skin care industry with scientifically advanced ingredient technologies and skin beneficial formulas comprised of high quality ingredients. And now, together with ageLOC® science, our skin care products are going a step further by helping to unlock the secret to a younger looking you—today and in the future.

FROM THE INSIDE OUT.

In addition to helping you look your best, we are committed to optimising the way you feel. Pharmanex® offers a complete approach, with food supplements formulated to nourish and protect your body. With dedicated scientists and affiliations with scientific institutions around the world, our research and development engine produce innovative products.
THE POWER TO DEFY YOUR AGE

The human body is a miracle. It naturally learns, evolves and repairs itself. In fact, your body is designed to live young. We are all born with internal ageing defence mechanisms designed to resist the effects of ageing. But over time, external and internal influences can disrupt natural youthful activity of these mechanisms and accelerate the ageing effects in the body. At Nu Skin, our research into how gene expression affects our ageing defence mechanisms has allowed us to deliver our most advanced anti-ageing supplement ever.

AGEING DEFENCE MECHANISMS

Ageing Defence Mechanisms are your body’s way of fighting off and maintain resistance to ageing aggressors. However as we age, our ability to resist, protect and repair at the cellular level declines. ageLOC Y-Span is Nu Skin’s revolutionary supplement designed to revitalise your ageing defence mechanisms—to help you live a more active and healthier life. Backed by more than 30 years of anti-ageing research, both our proprietary technology and unique scientific understanding have allowed us to create products that target the sources of ageing.

UNIQUE LICAP® TECHNOLOGY

ageLOC Y-Span takes advantage of a unique technology called Licap that allows delivery of both liquids and solids together in a hard shell capsule. This technology improves the bioavailability of fat-soluble ingredients, which helps ensure the delivery of anti-ageing benefits.

AGELOC® Y-SPAN® ANTI-AGEING BENEFITS

LIFEPAK® PROVIDES NUTRITIONAL SUPPORT FOR ALL BODY SYSTEMS AND ORGANS.

If you are pregnant—or considering becoming pregnant—do not take vitamin A supplements without consulting your doctor or pharmacist. When taken in excess of 3000 mcg retinol equivalents—vitamin A can cause birth defects. This product contains selenium which is toxic in high doses. A daily dose of 150 mcg of selenium from dietary supplements should not be exceeded. Selenium-containing products are not suitable for use by children under the age of 15 years. The recommended daily amount of vitamin A from all sources is 700 mcg retinol equivalents for women and 900 mcg retinol equivalents for men.
G3® - GÂC SUPERFRUIT BLEND
Taste g3—the superfruit juice that is validated by science with an abundance of cellular rejuvenation and immune support. Deliciously sweet, yet slightly tart, g3 delivers anti-ageing nutrition to fortify your defences against the effects of a modern world.

GÂC, THE KEY INGREDIENT IN G3, HAS LONG BEEN PRIZED BY THE PEOPLE OF SOUTHERN ASIA FOR THE VITALITY IT PROMOTES.

G3® GÂC SUPERFRUIT BLEND – THE PERFECT BEAUTY BEVERAGE
Every day we battle natural forces that cause our bodies and skin to age. g3 features a unique blend of highly bioavailable carotenoids—lipocarotenes, which help prevent future signs of skin ageing. This anti-ageing beverage also contains a significant amount of vitamin C, which helps prevent elastin and collagen breakdown.

The nutrient-rich juice from the prized gâc “superfruit” of Southern Asia contains ingredients that have been scientifically demonstrated to improve cellular function. Among gâc’s potent phytonutrients is a unique and highly bioavailable form of carotenoids called lipocarotenes that provide powerful antioxidant protection.

Combine gâc with three other superfruits—Chinese lycium (wolfberry), Siberian pineapple (sea buckthorn), and cili fruit—and you have a 100% natural juice product with powerful, targeted health benefits validated by science. Add g3 to your daily diet and experience the demonstrated difference it can make in how you feel each day.

**PHARMANEX® BIOPHOTONIC SCANNER**

The answer is the redesigned Pharmanex® BioPhotonic Scanner. The scanner has been updated with the latest technology to provide the most accurate, noninvasive, fast and convenient way to determine your antioxidant status and show whether your supplements are actually protecting you.

With the BioPhotonic Scanner, everyone can know their own antioxidant status, empowering them to make improvements to their diet and lifestyle, whilst making an informed decision about their supplements. The BioPhotonic Scanner S3 is the latest development from Pharmanex - 50 percent lighter and 60 percent smaller than its predecessor. The S3 is portable, battery-powered, possesses a faster warm-up time, and can scan faster - the average scan taking only 30 seconds to complete.

**HOW DOES IT WORK?**

By simply placing the palm of your hand in front of the scanner’s safe, low-energy blue light, within seconds you will obtain a reading of the carotenoid antioxidant levels in your skin—your Skin Carotenoid Scores (SCS).

In less than one minute, you can find out if your diet, lifestyle or supplements provide the antioxidant protection you need for promoting good health.

**SCIENCE BASED AND CREDIBLE**

Pharmanex is the exclusive owner of the patented BioPhotonic Scanner technology. Developed by doctors and scientists at a top US research university, the Pharmanex BioPhotonic Scanner is the world’s first and most advanced tool to measure carotenoid antioxidant levels non-invasively in living human tissue.

“Our understanding of antioxidants and their effect on overall health has dramatically increased through the use of the Pharmanex BioPhotonic Scanner. Since its inception in 2003, millions of people have been empowered to make better life choices through the personalised feedback they receive from the scanner.”

TRANSFORM YOUR LIFE IN 90 DAYS

A weight management and body shaping system, based on highly innovative gene expression science that unifies your mind and body—for a leaner, younger looking you.

EMBRACE A BETTER APPROACH

Diet after diet, fad after fad, we’ve become obsessed with a number on the scale. We weigh ourselves every day hoping the number will go down—and cringing when it goes up. It’s time to lose our dependence on the scale and embrace a better approach to the way we look and feel. Because the key to a lean and healthy body is not about the number on the scale, it’s about redefining your body composition to build a healthier, leaner you.

ALL PROGRAMS ARE NOT CREATED EQUAL

With traditional diets that are typically low in fat and high in carbohydrates, the weight people lose is part water, part fat, and part muscle. Muscle loss can account for 20 to 40 percent of overall weight loss.* With that loss of metabolically active muscle, metabolism slows down. In fact, for every kilogram of fat free mass you lose, your resting energy expenditure may decline as much as 25–40 kcals fewer each day. With the ageLOC TR90 program, the focus is on redefining your body composition by promoting lean muscle maintenance through our innovative meal plan and supplements, shifting the balance and making it easier to achieve your goals.

AGELOC® TR90™

A weight management system based on advanced gene expression science and helps balance mind and body by targeting three important contributors to healthy weight management.

HEALTHY METABOLISM

LEAN MUSCLE SUPPORT

APPETITE CONTROL

MAXIMISING YOUR IMPACT

For every "5 VitaMeal Bags Package" (07113527) donated, Nu Skin also donates one bag of VitaMeal. For all other VitaMeal donations, Nu Skin matches one bag for every eight bags purchased.

With VitaMeal plants in Malawi and China, the Nourish the Children initiative is also helping create new jobs and economic opportunities.

Visit nuskin.com.au and select 'Culture'.

Nu Skin scientists collaborated with a leading expert in child malnutrition to develop VitaMeal. One bag holds 30 child-sized meals – enough to provide the vitamins and nutrients necessary to nourish a child for a month. Since 2002, more than 550 million meals have been donated.*

* The price charged for VitaMeal includes the cost of manufacturing, general overhead, distribution, sales commission to Nu Skin Distributors as well as a reasonable profit margin. When you purchase a VitaMeal for donation to one of the Nourish the Children’s charity partners the VitaMeal is immediately donated to the charity for distribution, and Nu Skin cannot rescind the donation. Therefore, your donated purchase is non-refundable.
NU SKIN®
FORCE FOR GOOD FOUNDATION

Since 1996, the non-profit Nu Skin Force for Good Foundation has granted more than US$23 million to life-changing projects to help improve the lives of children around the world. Since Nu Skin covers all administrative and overhead costs for the foundation, 100% of donations from generous Distributors are used directly to improve the health, education and economic opportunity of children. In addition, a portion of every purchase of a product from our unique Epoch personal care line or of VitaMeal is dedicated to the Force for Good Foundation.

Major projects include:

• Teaching sustainable agriculture in Malawi with the Mtalimanja Village School of Agriculture for Family Independence (SAFI) and Seeds of Hope reforestation initiative.

• Providing schools and education resources to island children through Seacology.

• Funding research to find a cure for the devastating skin disease Epidermolysis Bullosa (EB).
