REVOLUTIONARY DISCOVERY

Aging appearance? Now it's in your control thanks to Nu Skin and ageLOC™. Developed by Nu Skin in collaboration with leading scientists, ageLOC science is a revolutionary approach that is changing the way we appear to age. This unique and proprietary approach to the science of aging is based on the discovery of age-related super markers, what Nu Skin calls "arSuperMarkers." Nu Skin's exclusive ageLOC science targets these arSuperMarkers—the ultimate sources of aging that can influence how we age.

Through ageLOC science, Nu Skin is able to identify certain genes that can regulate how we look as we age. These functional groups of genes—**Youth Gene Clusters**—are key **arSuperMarkers**. ageLOC science supports **resetting these Youth Gene Clusters** to their youthful patterns of activity and incorporates this science into the development of Nu Skin® products.
